

Work Performance Center

Facility

Located at the Eagan MOH clinic, the Work Performance Center consists of 4,000 square feet dedicated to virtual workplace assessments, FCE's and work conditioning.

Work Performance Test / HPE / Work Sim / POET / Physical Abilities Test, etc.

Match a candidate's physical abilities with the essential functional demands of the job, enabling employers to hire with confidence knowing exactly what if any accommodation would be needed to perform those essential demands.

On-site Job Site/Task Analysis

Development of ADA-compliant functional job descriptions and assessment tools.

Work Conditioning

Focus on functional productivity rather than pain. Conditioning up to 4 hours each day, 3-5 sessions per week as needed to increase strength and endurance. Options to combine productive light-duty work in conjunction with conditioning.

Functional Capacity Evaluations

Single and multi-day formats designed to measure clients' maximum physical abilities to determine return to work potential.

Specialty services

More than 8,000 employers have trusted Minnesota Occupational Health with their occupational medicine needs. Employers value our service ethic, clinical expertise, timely communications, walk-in services, on-site services and true partnership.

Key services include exams for:

- DOT
- FAA
- Hazmat
- Fire / Law Enforcement
- Fitness for duty

Medical surveillance for:

- Respirator Clearance
- Heavy Metals
- Silica, Coal and Asbestos
- Bloodborne Pathogens

Other specialty services:

- Random Drug Consortiums
- Ergonomic Assessments
- Onsite Flu Vaccination
- Onsite Respirator & Audio

“The occupational medicine physicians with Minnesota Occupational Health are the most knowledgeable and professional in this area. I greatly appreciate their breadth of knowledge, down-to-earth manner and assistance with problem-solving complex and difficult cases.”

—Connie B. DeVolder, RN, MPH, COHN-S

Human Resources Manager, Occupational Health, Metropolitan Council

Onsite drug & alcohol collection services

MOH employs trained and certified professionals who respond both to scheduled (random) drug testing events and to short-notice (reasonable suspicion or post-accident) collections.

Drug and alcohol testing can be performed for non-regulated and federal (DOT, FAA, USCG, Pipeline, FRA, FTA, etc.) collections.

Employers need only create an onsite account with MOH in order to have access to this 24/7/365 service.

Workshops and seminars

Minnesota Occupational Health directly and with its partners offers numerous workshops and seminars throughout the year. Recent and recurring topics include:

Reasonable Suspicion for Supervisors (drug & alcohol)

Medical Cannabis in the Workplace

Determining Causation in Workers Compensation

Functional Post-Offer Employment Testing

“When it comes to outstanding customer service, 24-7, on-site drug and alcohol testing, random drug screens, the professionalism from staff at Minnesota Occupational Health has exceeded all my expectations.”

— Tracy Hogan, SCLA

Risk Manager, Taxi Services, Inc. (Airport Taxi, Town Taxi & Yellow Cab)

Work injury experts

Providers at all three MOH clinics provide walk-in urgent care for nearly all work injuries, as long as the injury is not limb or life-threatening.

Employers who bring injured workers into the clinic can be included in the conversation between the patient and the MOH Provider when discussing recovery and light duty restrictions. MOH works closely with claims managers and QRC's when their involvement is required.

Work Injury Status Reports are sent electronically to the employer and all provider notes and transcriptions are sent to the claims manager and insurer.

MOH's full-time Workers' Compensation Specialist coordinates approvals, referrals, and scheduling within the MOH / Summit Orthopedics preferred provider network for advanced imaging, therapy and surgery.

“Minnesota Occupational Health has given our agency tremendous peace of mind. We know that all of our clients are in great hands with comprehensive case management and care coordination for each and every injured patient.”

— Mark Kraemer CIC, CWCA

Anderson Insurance & Investment Agency, Inc.
